CHECKLOGS: DL5MAE & Z38C .... THANK YOU VERY MUCH !

## CONGRATS TO THE WINNERS!

**RU1AA** wins the Multi OP Class,  
**ISO / HB9FAP** wins the Single OP Class !

and will receive the BCC Plaque...

Good luck and much fun in the next  
BCC MS CONTEST !

## Comments 2006

*Even with low power it is possible to make nice MS contacts. I was impressed again from strong back and side scattered reflections, helps me to make many short-distance contacts.*

*Thanks for fun and see you again in 2007 !*

*It was pleasure to be a part of BCC MS Contest !*

**George LZ1ZP**

---

1. Very good activity and super reflection in this year.
2. I had big problems during contest from time to time plus too much tecnical problems. I „murdered“ in first 10 minutes of start: 1st PA - GU35B, rotary yagi on a 32 meter high tower, GaAs FET PreAmp.  
I used single PA and lower fixed antennas from my 2nd QSO. No internet on my station.
3. Too many stations used DXCLUS, ON4KST chat... - OH!

**HA3UU / HA4A**

---

*It was my first "full-time" BCC MS contest and it was a nice chance to test my little EME station! PA, sequencer and relays worked really fine all the time! Compared to the last years I found the reflexions very fine with the maximum in the early morning of the 14th Dec.*

*With kind regards, 73,*

**Rudy PA3ECU**

---

Hello, here is my log

Many thanks for this very funny contest!

Please let me know if all is ok,

thank you and happy 2007

**73 Marco, IW0FFK**

---

*TNX for NICE MS Cont.2006. This is my first participation and I was very happy with the activity. Because I worked from the central part of the town, I had much, much terrible QRM [I also made some for my neighbours HI...]*

**LZ1OA Atanas**

---

FB contest this year, best portable result that we are ever made! Just nice to make QRM there when know that we made antenna setup 2 hour, most of operators made it maybe 10 years or even more. Hope BCC future have also "portable class" - because during Geminidies shower is great time for camping, never mosquitos problem. Night times burst were great, just nobody QRV 01-04 UTC, so QRL days and need to rest. Just good tips to small guns, be ready night times, then it's easy to work without pile'up. 2007 shower seems also to be without whole weekend...

**73 Janne OH5LID**

---

## Comments 2006

Hello dear friends of BCC,  
I had 3 evenigs free and i enjoy very much to partecipate your beautiful MS Contest.  
I was very happy to work TA in 2 meters (1st time) and a lot of very good stations.  
Some of you (DL and YU) stations I received via tropo , so I see you next SSB test.  
Best 73s and Merry Christmas and Happy New Year to you and your families .

### **73 de IV3MPI Edi**

---

*What a nice experience! After many years of qrx, again qrv on MS, and of course active on BCC Contest; my goal it was to have more qso then the 32 i had the past month in 2006 Leonids shower, so I win with myself! Big meteors activity both 13/14, but after 10:00z no more meteors; no peak found at 10:45z as predicted and no more qso, like a wall, probably because the radiant was setting 09:00z at my home! Thank you all for your patience to copy my signals from 'deep South'.....*

### **Gius, IT9VDQ**

---

Hello MS friends,

This year, our team worked in BCC MS contest under a call sign 4O9T, which was registered to our club for the event.  
We used the call sign to honour 150th anniversary of birth of great scientist Nikola Tesla.  
We were stationed in our usual location KN05FG.  
We completed 195 fsk441 QSOs during the contest.  
This was our equipment:  
700W and 3 x 11el Yagi  
Everyone who did QSO with us will get a special QSL card :)  
We want to thanks to all of you who called or worked QSO with us.  
You can see photos from contest on the website of our club:  
<http://www.yt7c.org>.

### **YU7MS/4O9T**

---

*I started my activities on 2M only 2 months ago. I have no experience with contesting, but this is a nice opportunity to do a first try.*

### **73 Frank PE1NFE**

---

## Comments 2006

*TNX for NICE MS Contest !!!*

*It was really lot of fun for me. I worked only 2 days, because I had to go to my QRL. I find that activity was very good. All QSO's I was made with the BCC procedure. Many thanks to the BCC team, who organize this nice MS Contest !*

**Best 73 ! LZ1DP / Hristo**

---

Thank all for the QSOs, I see you next time from new QTH JO47IA!

**vy 73 Benny / OZ5AGJ**

---

*... NC and hrd, or called me but no QSO because other QSO same time:  
HA5CW 26, DL5FDP 26, DH4FAJ, DL4NAK, DF5LE, RXIAS, G4FUF, SQ2SAT,  
DL5BBF, DJ3VI, OM5CM*

*I worked in this fb BCC contest after long time. My three first BCC MS contest's in OH2AV Club station began 1990 (?) with tape recorders, timers, up-converters, memory keyers etc etc versus PC system now have same hard job for me because I'm no young man anymore!*

*Station: Modified TR-751A + modified NAG-144XL + CueDee 144-15  
10 deg tilted for MS*

*Programms: WSJT version 5.9.6 r309 and WinMSDSP 2000 (10.12.2000)*

*PC: IBM 600E laptop 366MHz 6G HDD 288M RAM.*

*Isolated home made interface*

*Longest QSO 1915,9km with F6HVK.*

*73 and happy 2007 de*

**Yussi OH7TE (ex OH9TE, OH9NLO)**

---

I have participated for the first time to this contest and I had the impression, that this contest recalls a big number of stations... I worked 5 new in this contest!

There were good reflections this year with the peak at morning of the 14th....

**73 Gianni, IW4ARD**

---

*... After my preamp died, I had to wait for better reflexions. This time I had no problems with the "QSY" procedure. Please note, my locator is JO43VI since about 5 years..*

*Best 73,*

**Sigfried, DJ3VI**

---

I just moved to my new QTH and there are no antennas installed yet. So I thought give it a try with a small 5 ele Yagi (2m boom) inside the house - next to a first floor window which is

## Comments 2006

facing towards the eastern direction. It proved that Meteorscatter QSOs are possible even with a very simple setup. Operating time was also limited due to work and family commitments - total time spent at the radio was about 10 hours. Thanks to everybody for the QSOs - hope to work you again with a more competitive setup next year.

**Maik DJ2QV**

---

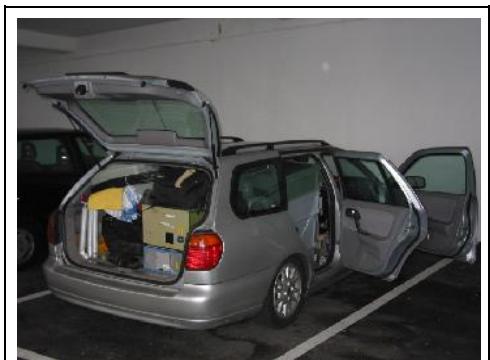

QTH from IS0/HB9FAP, Fabio,  
who won the BCC MS Contest  
2006 as single OP!

„Man at work“

... Oh my god! But it runs...!

It  
's good to have a big car!

# EA3DXU - silent key !

## Dear Friends,

in 1990 I created a new contest. This was a Meteor Scatter Contest organized by the Bavarian Contest Club (BCC). Since the very first contest we had Jose, **EA3DXU**, as a regular participant.

As most of you probably know we lost our good friend Jose on October 5th 2007 at 04.30 utc after some time of illness.

Jose was a very enthusiastic VHF operator and DXer. Also, he was doing DXpeditions by himself(i.e. C31 or EA9 and others). I personally worked Jose on almost each possible mode on 2m (Es, MS, FAI and EME, even when he had just a single yagi). I also worked Jose when I was on DXped myself, on MS from SV9, CT3 via EME when I was active as 9Y4/DL5MAE or 5B4/DL5MAE. This EME CW contacts took place from 2 yagi - 2 yagi only!

Our friend Jose got 2m DXCC with just 2 yagis and worked NF2V (Vermont State) for his WAS # 50 just a few days before he passed away! TNX to NF2V!

I am really glad I met Jose also personally. First time it was sometime in the 80s in Weinheim and the 2nd time it was in Switzerland at the EME meeting. I did not know him very close but I will keep his friendliness and cordial character for ever in my mind. World is changing fast and everything has to go fast and faster and commercial. I am so much more happy meeting such a nice chap like Jose, a fantastic person, I enjoyed every contact with him. A real friend has gone.

We will miss you Jose!

Vy 73 de DL5MAE Wolfgang

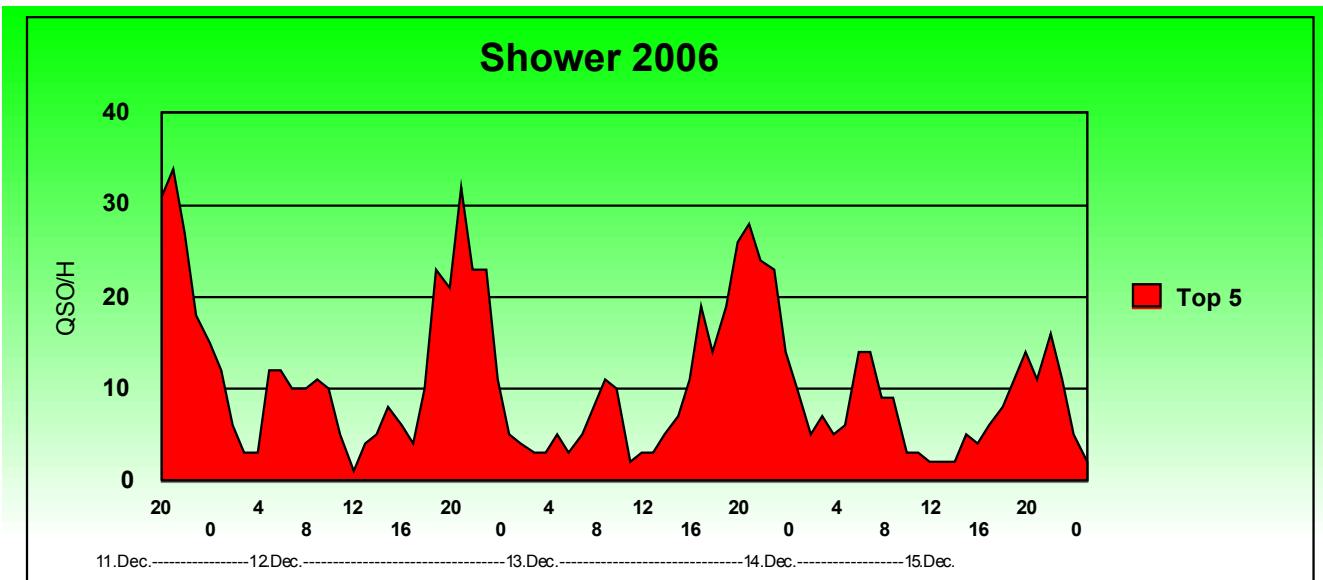

(EA3DXU original comment in the BCC 1996 soapbox:

*...This year I noticed lots of stations which were impatient. From some which I was not able to response at the first period they used to abandon the QSO. To 13 other stations I was transmitting final-RRRRR without getting final-RRRRR back. I think there is no need to be nervous, for MS random it is necessary to be a little bit patient. As the other years the BCC MS Contest was wonderful!*

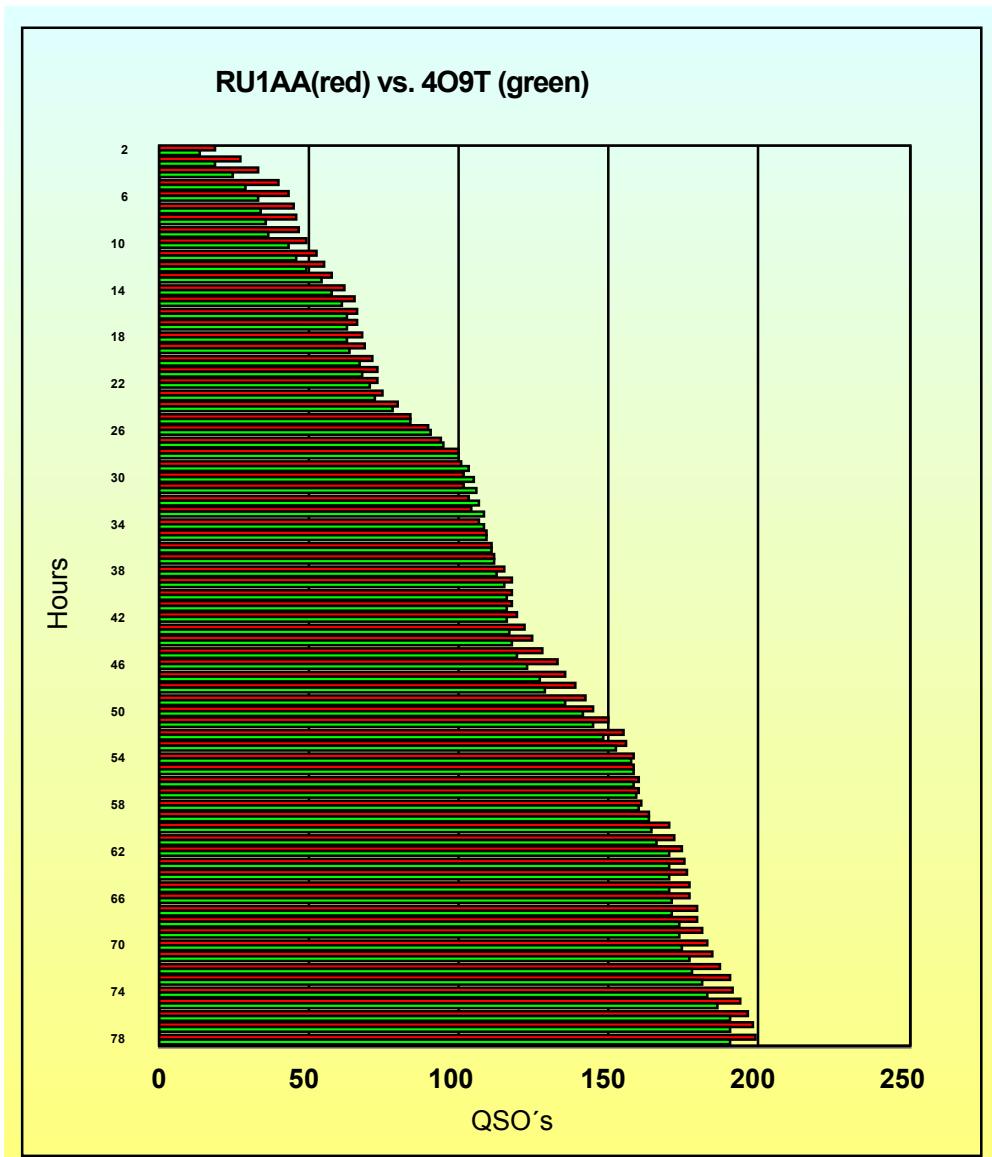

Thank you Jose, take your time!!!!

# STATISTICS 2006

This year we cannot find a real peak. With WSJT you can work even in the minimum lot of MS-DX!

"Neck to neck": The 2 best Multi OP stations: **RU1AA** and **4O9T**

# BCC MS 2007

The Bavarian Contest Club (BCC) invites all active meteor scatter enthusiasts to join the MS contest hold during the Geminids shower 2007. The aim of the contest is to generate more activity on the random frequency and make MS random operation more popular. It will also provide interesting information about MS propagation at various times of the shower. And it will give the little pistols a chance to work the big guns, who are usually just out for square hunting.

**Contest period:** 11 December 2007, 20:00 UTC to 15 December 2007, 02:00 UTC.

**Mode:** CW and / or WSJT.

**Participation:** Category I: Mixed Single Operator ,  
Category II: Mixed Multi Operator .

During the contest it is allowed to change the QTH to another grid square. In this case the same station can be worked again. The new QTH must be indicated by the callsign (e.g. OH2AV, OH0/OH2AV). You can take part in **HSCW as well as in WSJT**, but you have to mark each QSO with the mode (CW/WSJT).

**Sked QSOs do not count for the contest ! QSOs confirmed via Packet Radio or Internet do not count for the contest !**

**Frequencies:**

**CW:** It is recommended to use the frequency range from 144.095 to 144.105 MHz for CQ calls using the **IARU Region 1 procedure** (letter system). There are no frequency limits. If there is no clear frequency between 144.100 to 144.126 MHz, then please try to use a "Extended Letter System" (i.e. CQ "AA" = TX-QRG + 27KHz, CQ "BB" = TX-QRG + 28KHz, CQ "CC" = TX-QRG + 29KHz...).

**WSJT:** It is recommended to use beside the frequency **144.370** MHz also **144.350** for CQ Calls. Alternate to the IARU Region 1 procedure you should use the „**BCC-procedure**“ with two or three numbers of your operating QRG (i.e. „CQ 68“ or „CQ 368“ means, that your operating frequency is 144.368 MHz ).

**Only one TX signal is allowed at any time .**

**Exchange:** Full callsigns, reports and final rogers.

**Scoring:** A complete random **WSJT** MS QSO counts **1 QSO** point. A **WSJT** random MS QSO achieved **using the letter or BCC system** counts **3 QSO** points. A complete random **HSCW** MS QSO counts **2 QSO** points. A **HSCW** random MS QSO achieved **using the letter or BCC system** counts **6 QSO** points.

**You can work a station one time in CW and one time in WSJT** (exception: change of QTH.)

**Multiplier:** Sum of different prefixes worked. Prefixes are defined according to WPX rules (Example: DL5, DL1, DJ8, DA0, DF9, I2, IK2, IW2, IT9, EA3, EB3, RK2, W7, WB7, PA0, PA3, S51, S53 are different prefixes).

# BCC MS 2007

**Final Score:** Total QSO points times multiplier. **Example: 10 HSCW and letter system QSOs give 60 points, 15 WSJT letter QSO's 45 points and 10 WSJT Random QSOs 10 points, together 115 points. You worked in CW and WSJT 20 different prefixes. Final result: 20 x 115 = 2300 Pts.**

**Logs:** The following data must be included: Operator's name, category, callsign, address and QTH locator. Multi OP stations list all operators. For each QSO: date, time in UTC, worked station, report sent and report received and mode (CW/WSJT) must be given. Mark all QSOs which were conducted using the IARU-Region-I letter system. Also technical data about equipment and antennas used should be stated. Deadline is 31st December, 2007 (postmark).

**Awards:** The winner of the contest is the station with the highest score. If two stations submit equal scores, the log with the better multiplier wins. The winner of each Category will receive a plaque. Printed results will be sent to all participating stations via E-mail or snail mail. Magazines and radio amateurs world wide have been informed about this activity.

Please send your Logs to following adress :

**Bavarian Contest Club  
- MS Contest -  
Kellerberg 2  
85461 Gruenbach,

# REGELN 2007

Der Bayerische Contest Club (BCC) lädt alle aktiven Meteorscatter-Freunde zu einem Meteorscatter-Contest während des Geminidenschauers 2007 ein. Ziel des Wettbewerbs ist es, die Random- Frequenzen zu beleben und die MS-Random-Aktivität zu steigern. Der Wettbewerb dient außerdem der Erforschung der MS-Ausbreitungsbedingungen zu verschiedenen Zeiten dieses Schauers. Er gibt Stationen mit kleiner Ausrüstung eine Gelegenheit, die DXer zu arbeiten, die normalerweise nur Ausschau nach neuen Großfeldern halten .

|                          |   |
|--------------------------|---|
| <b>Wettbewerbsdauer:</b> | <b>11. Dezember 2007, 20:00 UTC bis 15. Dezember 2007, 02:00 UTC.</b>             |
| <b>Betriebsarten:</b>    | <b>CW und / oder WSJT</b>   |
| <b>Teilnahme:</b>        | <b>Kategorie I: Single Operator Mixed,<br/>Kategorie II: Multi Operator Mixed</b> |

Während des Contests ist Standortwechsel in ein anderes Großfeld zulässig. In diesem Fall dürfen die gleichen Stationen wieder gearbeitet werden, der QTH- Wechsel muss jedoch am Rufzeichen erkennbar sein (z.B. OH2AV, OH0/OH2AV). Man kann **abwechselnd Betrieb in CW und WSJT** machen, für die Auswertung wird pro QSO die entsprechende Betriebsart vermerkt ! **Sked - QSO's sind nicht zulässig, ebensowenig Bestätigungen via Packet Radio oder Internet !**

## Frequenzbereiche:

**CW:** Es wird empfohlen in den Frequenzbereichen von 144.095-144.105 MHz "CQ" zu rufen und die IARU-Region-1- Prozedur (Buchstabensystem) anzuwenden. Es gibt keinen vorgeschriebenen Frequenzbereich. Sollte im Bereich 144.100 - 144.126 MHz keine Frequenz frei sein, wird empfohlen, ein "erweitertes Buchstabensystem" nach folgendem Muster anzuwenden: CQ "AA" = TX-QRG + 27KHz, CQ "BB" = TX-QRG + 28KHz, CQ "CC" = TX-QRG + 29KHz usw.

**WSJT:** Es wird empfohlen, neben der QRG **144.370 auch 144.350** MHz als Anruffrequenz zu verwenden. Alternativ zur bekannten IARU Buchstabenprozedur wird die „**BCC - Prozedur**“ empfohlen, wobei nach dem CQ die zwei oder drei letzten Ziffern der Betriebsfrequenz gesendet werden ( z.B. „**CQ 68..**“ oder „**CQ 368..**“, was bedeutet, dass die Arbeitsfrequenz auf 144.368 liegt). **Jede Station darf nur ein Sendesignal abstrahlen!**

**Rapportaustausch:** Auszutauschen sind komplette Rufzeichen und MS-Rapport, entsprechend den Regeln der IARU Region I.

**QSO-Punkte:** Ein komplettes **WSJT** Random-QSO zählt **einen** Punkt. Ein nach dem o.g. Buchstabens- oder BCC System geführtes **WSJT** QSO zählt **drei (3)** Punkte. Ein **HSCW** Random QSO zählt **zwei (2)** Punkte, ein **HSCW QSO** nach dem Buchstabensystem **zähltsiechs (6)** Punkte. Eine Station kann jeweils in CW und in WSJT gearbeitet werden (Ausnahme: bei Standortwechsel).

**Multiplikator:** Anzahl der verschiedenen gearbeiteten Präfixe, entsprechend den WPX-Regeln (Beispiel: DL5, DL8, DJ1, DA0, DF9, I2, IK2, IW2, IT9, EA3, EB3, RK2, W7, WB7, PA0, PA3, S51, S53 sind alles verschiedene Präfixe).

**Endpunktzahl:** Summe der QSO-Punkte mal Multiplikator. Beispiel: 10 HSCW QSOs nach dem Buchstabensystem 60 Punkte, 15 WSJT QSOs nach dem Buchstabensystem 45 Punkte, 10 WSJT QSOs Random 10 Punkte, zusammen 115 Punkte, in CW und WSJT zusammen 20 verschiedene Präfixe ergibt  $20 \times 15 = 300$  Punkte

**Logführung:** Die Logeinsendung muss folgende Daten enthalten: Name, Rufzeichen, Adresse, Kategorie und QTH-Kenner des Funkamateurs. Jedes QSO muss mit Datum, Uhrzeit in UTC, Rufzeichen der Gegenstation, dem gesendeten und empfangenen Rapport und der verwendeten Betriebsart(CW/WSJT) aufgeführt werden. QSOs, die nach dem Buchstabensystem abgewickelt wurden, müssen markiert werden. Multi OP Stationen geben alle Operatoren an. Eine detaillierte Beschreibung der Stationsausrüstung sollte mit eingesandt werden. Einsendeschluss ist der 31. Dezember 2007 (Datum des Poststempels).

**Auszeichnungen:** Der Gewinner des Wettbewerbs ist die Station mit der höchsten Punktzahl. Bei gleicher Endpunktzahlen entscheidet der höhere Multiplikator. Die ersten Plätze jeder Kategorie erhalten eine BCC Plakette . Ergebnislisten werden an alle Teilnehmer versandt. Zeitschriften und Funkamateure in fast allen europäischen Ländern sind über diese Aktivität informiert.

Bitte die Logs an folgende Adresse schicken :
