As contestmanager for the 2025 edition of the "144 MHz Meteorscatter Sprint Contest"

I certify that the results above are true and correct to my best knowledge and belief.

Frank Veldhuijsen, PA4EME

All distances have been recalculated by the contestmanager to prevent differences in way of calculating and round up errors;

Remarks:

Error% is based on locators that are logged different than specified from the station worked. Stations with high Error% should check their logs for wrong or incomplete locators.

Some stations report QSO's with distances below 400 km; these are classified as normal tropo.
